9:30 am - noon

California Public Utilities Commission  
505 Van Ness Avenue, Auditorium  
(Corner of Van Ness Avenue and Mc Allister Street)

The Commission is conducting a two-day workshop seeking input from the public on the operations and funding of the state's Universal Service Public Policy Programs (PPP). The information from the workshop will be used to develop an Order Instituting Rulemaking (OIR) that will be issued after the workshop. The purpose of the OIR will be to conduct a comprehensive review of the PPPs. The Commission is seeking input at the workshop to help identify whether the existing programs meet the objectives of applicable universal service statutes and what, if any, changes are required to improve the existing program structure, ease program administration, aid in managing the size of the funds, and ensure adequate monitoring of the programs' costs to consumers.

The Commission is interested in hearing the views of the public, the industry experts, and other participants at the workshop. To facilitate the discussion at the workshop, the Commission staff has issued a report discussing the funding mechanism and three of the programs:

Universal Lifeline Telephone Service  
Deaf and Disabled Telecommunications Program  
California Teleconnect Fund

Order Instituting Rulemaking to establish policies and rules to ensure reliable, long-term supplies of Natural Gas to California.

**Summary:** On April 5, 2006, Colin E. Cushnie, Director of Southern California Edison Company (SCE), met with Nilgun Atamturk, advisor to Cmmr. Grueneich, and Lindsay Brown, advisor to Cmmr. Bohn, in two separate meetings in San Francisco. Also present were Luis Pando, Manager of SCE, and Henry Hogo of the South Coast Air Quality Management District. Written material (attached to the notice) was used. Cushnie stated that the Commission should adopt SCE's proposal to implement an interim gas quality standard that is consistent with the quality of natural gas historically delivered to end-use customers of Southern California Gas Company (SoCalGas) and San Diego Gas & Electric Company (SDG&E). Cushnie urged the Commission to require a definitive study to determine whether it is more cost effective to require LNG facilities to deliver gas supplies to the SoCalGas/SDG&E system that is consistent with the historical heat content of natural gas deliveries to end-use customers or to require end-use customers to be responsible for making any necessary modifications to their gas-burning equipment to accept higher heat content gas. Hogo explained that higher heat content gas from LNG deliveries should not be allowed and that instead, the Commission should require SoCalGas and SDG&E to accept natural gas supplies with a heat content that is more reflective of historical gas deliveries to end-use customers in southern California.
